

Hako-Jonas 1900

NEW

The power package
for heavy duty use.

Industrial
Cleaning

The advantages at a glance:

Engine swivels out: direct access for extremely easy maintenance.

High climbing ability: thanks to the hydraulic drive gradients of up to 16% can be negotiated without problem, whilst sweeping.

Large wheels and a comfort seat ensure permanent ergonomic use even on rough terrain and under extreme conditions.

High degree of separation of over 99%. The large filter surface area of more than 11m² separates the dust cleanly from the air.

A lift height of 1.62 m guarantees that debris can be emptied into almost every type of rubbish bin.

The RTR (Rotary Trash Relocator) System

Advantage: Increase in usage times by optimizing the hopper space. The net filling level is considerably increased thanks to the RTR system.

Technical Data Hako-Jonas

1900 LPG

1900 D

Sweeping width	cm	122	122
With 1 side brush (2 side brushes)	cm	156 (193)	156 (193)
Sweeping performance (theoretical)	m ² /h	25 000	25 000
Dirt hopper volume	Litres	780	780
Emptying height up to	cm	162	162
Filter area	m ²	11,15	11,15
Power/output	kW	33,0	26,5
Speed	km/h	13,0	13,0
Weight, ready for operation	kg	1710	1710
Width/length/height	mm	1520/2790/1470	1520/2790/1470

Options available: overhead guard, side brush suction, air conditioning, driver's comfort cab, left hand side brush.
